Tar.Q: Retrieving img from other page on button click I am trying to retrieve images from another page after clicking a button on the main page. The main page is using src="...", while the img is defined in the header of the other page. The code on the main page: The code from the other page: I have read around the web and followed a few tutorials to no avail. Does anyone know how to do this? A: You would have to make a post request to another page to download the image. For ajax request, check this out. Or, you could just make a link to the image. Why do you want to make money with cryptocurrency? Cryptocurrencies are certainly not a new thing. Since they were invented, people have been wanting to make money with crypto. What is the difference between you and all the others who want to make money with crypto? First of all, you want to improve the value and capacity of their investment. This means using
