About This Game

Hand Simulator is a game in which you control your own hands (You do not need a VR helmet, you just need a keyboard and mouse). There are many different levels where you can play with spinners, plunge into the subtleties of handling weapons, milk a cow, take part in a Mexican duel with your friends, have a good time fishing, play chess or simply chat in an anonymous club.

Hand Simulator is a game where everyone finds entertainment for their tastes.

Features:

- A lot of different levels. The game is developed every day; players' most interesting ideas are inevitably realized.
- Multiplayer. For online games fans there are many levels implemented in Hand Simulator; there you can have fun with your friends.
 - Detailed mechanics of weapons. In order to make at least one shot, you will have to work hard.
- Achievements. In each level, both online and offline, there are tasks in the performance of which, you will receive achievements.
 - Collectible cards.

Tanks are back! New level of realism!:

Battle up to 10 players!

Only one will survive!

. Bug fixes:

Fixed synchronization of AKM at the level of "Afghanistan".

On the "Medium" quality setting, shadows are disabled to increase FPS on weak PCs.

Other minor fixes.. **New level of the Vikings:**

Take the weapons on the tables and fight! The last survivor wins!.. **Fixes and improvements:**

Fixed animation sniper rifle

Increased likelihood of biting on fishing

Animation of the trigger from the revolver

New weapons in Shooting

All kill reports are now shown to the right

Fixed spectacles in Shooting

The blood from the shot remains on the person

Blood on objects does not light up on a person

Fixed a bug that did not give out achievements in Gunfighter and Spinners. **Please test the branch "development" (v. 2.7.f2) and report the result:**

It is necessary to test the operation of the joystick and the hand on the subject of bugs with involuntary movement upwards (in the version v. 2.7.f2).

P.S. If the joystick is connected, the keyboard control is disabled. To avoid unnecessary bugs.. **Support VR:**

In the game you can use the HTC Vive headset, Oculus Rift and others. Control only the keyboard + mouse. The plans to make support of different VR controllers.. **Bug fixes:**

- Added region selection
- Other minor fixes and improvements
